SAFEGUARDING INFORMATION

Safe Sport

The International School Sport Federation (ISF) reaffirms its commitment to the protection, well-being, and positive development of young athletes and all participants involved in this event. Ensuring a safe, respectful, and inclusive environment is a fundamental priority, guaranteeing that every athlete has the right to practice sport with dignity, support, and protection. This commitment reflects our shared responsibility to uphold safety as a core value in school sport.

This event has implemented a **Safe Sport Program** that includes formal protection policies, prevention and response procedures, educational activities, and awareness campaigns. In addition, **Safeguarding Officers** have been appointed and trained to support participants, receive and manage concerns, and respond to any reports with seriousness and confidentiality.

These Officers will be available throughout the event to assist athletes, coaches, team officials, and delegation members. Any concern or report regarding inappropriate conduct will be handled respectfully, responsibly, and in accordance with international and local safeguarding standards.

Throughout the competition, educational workshops will be delivered to athletes, reinforcing essential values such as respect, empathy, care, and safe conduct in sport. We invite all delegations to participate and contribute to a positive and welcoming event environment.

For guidance or to report a concern, the official channels are available:

Phone: [+55 21 97288-9737](tel:+552197288-9737)

Email: safeguarding@isfsports.org

In-person: [directly with the event Safeguarding Officer](#)

Protecting children and young people in sport is a collective commitment. We count on each of you to help ensure a safe and inspiring experience for all participants.

Safeguarding in sport is everyone's responsibility.

The ISF Academy is the educational center of the International School Sport Federation delivering online and onsite capacity-building activities for teachers, school sports representatives, coaches, officials, and students around the world. It aims to recognize and or to upgrade the knowledge and skills of any of these stakeholders involved or planning to be involved in national, continental, or international sports, educational networks, institutions, events, or organisation.

The mission of this body is to design and deliver short-, mid-, and long-term quality education and capacity-building activities for students, physical education teachers, national school sport representatives, coaches and officials around the world. These educational programmes will be held online on the ISF Academy platform prior to the events and particularly during the organisation of ISF events on-site, after the competition hours.

Therefore, before and during this international ISF event, heads of delegation, coaches, referees, international school athletes, and local school students will have the opportunity to take part in various interactive educational activities on different topics.

ISF ACADEMY

EDUCATIONAL ACTIVITIES

You will find below a list of themes that will be proposed to young athletes during this event:

- Safeguarding Children in Sport
- Anti-Doping prevention in Sport
- Injury Prevention

Please note that these **activities are compulsory to attend** during event particularly for the school athletes. The educational activities will take place on the 13-18th of November(Except 16th).

SAFEGUARDING IN SPORT: PROTECTING YOUNG ATHLETES AND PROMOTING SAFE PARTICIPATION

We believe that children have the inner resources if educated, to fully understand, identify and react in front of negative behavior such as racism, gender inequity or violence and abuse. The challenge for ISF is to find the right way to express difficult ideas and present complicated topics to young people in order for them, not only to understand but also to appropriately apprehend this issue and be able to react if facing it.

Creating awareness and giving the opportunity for the participants to be able to transfer their knowledge when getting back home to their peers is also key to ISF.

The Safeguarding Workshop places young athletes at the center, recognizing their role as leaders and ambassadors of positive sport values. Our commitment is to ensure that every participant enjoys sport free from behaviors that compromise their physical and emotional well-being.

In a 30-minute interactive session, participants learn to understand what safeguarding means in sport, recognize different forms of interpersonal violence, respond safely if they or a teammate are in danger and seek help from trusted adults and support systems. Above all, this workshop reinforces a fundamental message: Safeguarding in sports is everyone's responsibility.

ANTI-DOPING EDUCATION

Anti-doping education is of the utmost importance for young people due to several compelling reasons and we believe that young people have the inner resources to fully understand, identify and react in front of negative behaviour such as doping.

The challenge for ISF is to find the **right way to express difficult ideas and present complicated topics to young people** in order for them, **not only to understand but also to appropriately apprehend this issue and be able to react if facing it**. Creating awareness and giving the opportunity for the participants to be able to transfer their knowledge when getting back home to their peers is also key to ISF.

Anti-doping education goes beyond the realm of sports. It serves as a platform to impart valuable life lessons and cultivate ethical values in young individuals. By emphasizing the importance of honesty, integrity, and personal responsibility, anti-doping education contributes to the moral development of young athletes. It encourages them to make informed choices, stand up against cheating, and develop a strong sense of integrity that extends beyond the realm of sports and into other aspects of their lives. anti-doping education plays a crucial role in shaping the attitudes and behaviors of young people involved in sports. Educating them about the risks, consequences, and ethical implications of doping, promotes health, fair play, and integrity while providing them with the necessary tools to make informed decisions that align with their long-term well-being and athletic aspirations.

The law and the rules are important, but it is not just rules that safeguard our sport for clean athletes, but also the measures and processes that help put those rules into action. We must all play our part in promoting fair play and that means gaining an appreciation of what leads to certain decisions being made.

INJURY PREVENTION TO ATHELTES PERFORMANCE

Basics to Specifics

Today's daily routines with long sitting hours, screen work and mobile devices in use all day long, posture and related pain syndromes become more and more important.

At the same time almost all international sport federations tend to start in younger ages with competition on continental and world level. Therefore, national federations, clubs and even schools started to focus on specific training mainly, basic education is mainly neglected due to a lack of time and very often due to a lack of interest of young athletes as training of basic abilities is considered less fun and quite often boring. A matter of presentation and wrapping from our point of view.

This workshop will focus on Injury Prevention with its various factors, the meaning of "the basics" such as mobility, flexibility and stability for both, injury prevention / health as well as performance and provide as well as best practice examples of how to implement Injury Prevention routines into daily sport routines at school or in clubs.

Based on our long-term experience in high performance sports from children to Olympic athlete level we are convinced that Injury Prevention, the work on the basic abilities and the specific training do not necessarily mean an "either or" but can go together very well, respecting practical limitations in time and by the number of educational needs in specifics and with some fun.

A couple of minutes only, integrated into warm-up and cool-down routines can make a significant difference in terms of overuse of structures and risks for injury for all age groups but in particular during the vulnerable period of growth.

ISF ACADEMY

FUN & SKILL ZONE

The Fun and Skill Zone concept aims to provide the participants athletes, coaches and the local young participants with an area where a variety of activities are proposed on a daily basis. ISF Academy educational and national organisations & partner booths will gather aiming to raise awareness on the Olympic values and art, to discover traditional or innovative sports, and to discover the culture of the different participating countries and particularly Brazil.

Participants will have the opportunity to engage in a variety of mixed activities with all our Sports partners—ranging from traditional and fun games to team-building and sports activities—designed to promote broader knowledge of values, skills, cultures, and practices.

It will be the heart of this event. The place where the different delegations can meet, learn, discuss and get to know each other better.
